Mitutoyo

PROMOTION!

Valid from October 1, 2020 through January 31, 2021

MEASURLINK 9

MeasurLink® ENABLED
Data Management Software by Mitutoyo

MeasurLink 9 – Data Collection and Real-Time Statistical Process Control

MeasurLink is designed to collect and unite all measurement data in a centralized database. Measurement results acquired via CMMs are automatically transferred into a SQL database and are available for monitoring, analysis, or reporting in real-time.
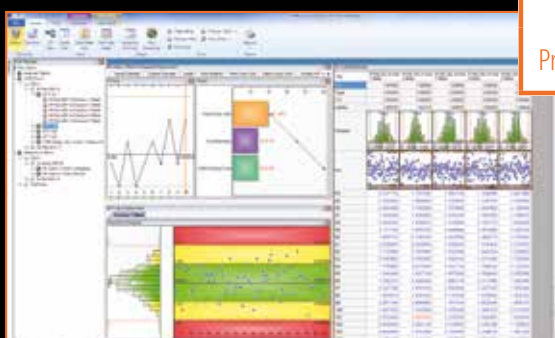

No. 64AAB607R

€ ~~1.850~~

Promo price € 1.579
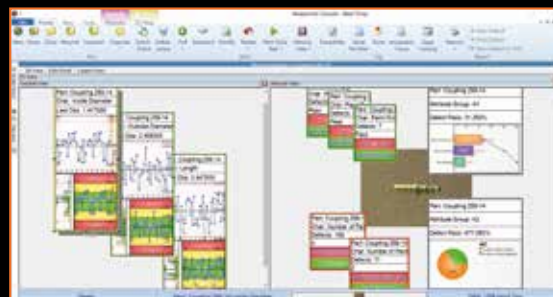

> MeasurLink Real-Time Professional Edition enables customers to connect and acquire data from Mitutoyo Coordinate Measuring Machines, Vision, and Form Measuring Systems via native integration (DDE).

> MeasurLink Real-Time Professional Edition plus HOOPS 3D support

> Data Analysis Module Process Analyzer gives you the flexibility to analyze your processes, identify problem areas, and take corrective action to improve your product's quality.

> MeasurLink Process Manager: Network monitoring

> MeasurLink Gage Management: Gauge inventory and calibration control

> MeasurLink Gage R & R: Gauge repeatability and reproducibility

FREE MEASURLINK 9 – TRIAL VERSION

Those who would like to assure themselves of the great performance and the vast user-friendliness of MeasurLink 9 have the chance to test a full version of the powerful SPC suite for 60 days upon brief registration. Well-comprehensible tutorials introduce you to the easy setup and use of the software suite. MeasurLink 9 offers a choice of 17 languages, with the online help function coming in English, French, and German.

USB INPUT TOOL / USB INPUT TOOL DIRECT

› These devices allow for direct connection of DIGIMATIC measuring instruments to a USB interface without the need for additional software.

› Measurement data is converted into keyboard codes, enabling interaction with any program using keyboard entries (HID).

› You can also connect the box type as well as the cable-integrated type to a PC USB port with a fixed COM assignment in Microsoft® Windows® as a channel identification (VCP). The USB-ITPAK software contains the driver for the virtual COM port (VCP).

**06AFM386:
USB-ITPAK AND USB DONGLE**

USB-ITPAK V 2.1 creates a procedure to input data from gauges equipped with DIGIMATIC output to Excel® sheets via:

• A part manager automatically opening an Excel® sheet

• Entering sequence specified

• Input range specified per DIGIMATIC gauge, reducing improper input

• This software is compatible with:
  • USB INPUT TOOL DIRECT
  • USB INPUT TOOL
  • U-WAVE SYSTEM

Above-mentioned prices are Mitutoyo's suggested non-binding retail prices without VAT.

3

U-WAVE fit

The slim, powerful, and lightweight measuring data transmission system

U-WAVE AND U-WAVE fit – WIRELESS DATA TRANSMISSION SYSTEM

> Approx. 20 m within visible range

> Communication frequency: 2,4GHz wireless system for reliable and secure data transmission

> Easy data export to Microsoft® Excel® or other professional SPC software applications like Mitutoyo MeasurLink

> Transmitter confirms data transfer via buzzer sound or a red/green LED signal

> An IP67 transmitter is available

> Low power consumption: 400.000 data transmissions with one battery

No. 02AZD810D

€ 324

Promo price € 219

U-WAVE-R

For micrometers U-WAVE-TM
with connection unit

U-WAVE-TC for calipers
with connection unit

**For various measuring instruments: U-WAVE-T**
with connection cable

U-WAVE-T connected to a Digimatic gauge via cable matching the gauge's specific data interface.

4

Above-mentioned prices are Mitutoyo's suggested non-binding retail prices without VAT.

U-WAVE 🔵 ❋ Bluetooth®

U-WAVE BLUETOOTH – EASY WIRELESS DATA TRANSMISSION SYSTEM

> Approx. 10 m within visible range
> Easy data export to Microsoft® Excel®
> Transmitter confirms data transfer via buzzer sound or a red/green LED signal
> An IP67 transmitter is available
> Low power consumption: 200.000 data transmissions with one battery when connected to a mobile device (tablet, smartphone, etc.) and 50.000 data transmissions with one battery when connected to a PC

FOR PC U-WAVEPAK-BW

> Connection management, data reception (BLE), event-driven configuration, Virtual COM Port communication
> 7 units can be connected
> Supports Windows 10; list of supported builds available on www.mitutoyo.eu
> Available in Japanese and English languages

FOR MOBILE DEVICES U-WAVEPAK-BM

> Connection management, data requests, data reception (BLE), event-driven settings, Data logging (Folder setting for each work), data transfer (CSV), Tolerance judgment display (Indicator), graph display (History), Statistics Processing (Histogram)
> 3 units can be connected
> Available in English only
> Supports Android and iOS

U-WAVE WIRELESS TRANSMITTER IS PLACED ON THE BACK SIDE OF CALIPERS

The shape and size of the transmitter unit is corresponding to the display unit, hence ergonomic in your hand.

> Up to 20 m communication within visible range
> Secure and reliable data transmission
> Easy data export to Microsoft® Excel® or other applications
> Successful data transfer is confirmed by the transmitter through a buzzer or LED
> Low power consumption (400.000 data transmissions with a single battery)

MITUTOYO ABSOLUTE CALIPER WITH EXTRAORDINARY BATTERY LIFE

Mitutoyo Absolute technology save costs. Our standard caliper has an 18.000 h battery life or appr. 5 years when used regularly.

COOLANT PROOF TECHNOLOGY (IP67 TYPE)

Mitutoyo uses materials that are extremely resistant to emulsion, oil, grease, and coolant when manufacturing "COOLANT PROOF" measuring equipment.
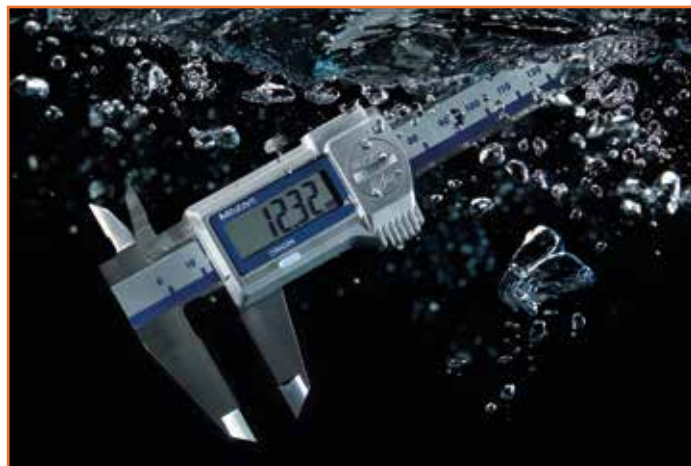

500-155-30 CALIPER WITH CARBIDE TIPPED JAWS

The 500-155-30 is a caliper with carbide tipped measuring jaws for outside and inside measurement. Excellent for measuring abrasive parts.

U-WAVE Bluetooth and U-WAVE fit compatible

QuickMike – WITH A NON-ROTATING SPINDLE FOR EXTREMELY QUICK MEASUREMENTS

› With a spindle feed of 10 mm per revolution, the measuring face drives twenty times as fast as standard devices
› Excellent resistance against water and dust (IP65) enables this micrometer to be used in machining situations that include splashing coolant fluid
› ABSOLUTE linear scale means no restriction on adjustment speed
› Larger measuring span of 30 mm

OVER 100 DIFFERENT TYPES OF MICROMETERS FOR ANY NEED

› Mitutoyo carries over 100 different special-purpose digital micrometers to solve problems in hard to reach places
› The majority of these special-purpose micrometers have high-grade ingress protection of IP65

323-250-30

331-251-30
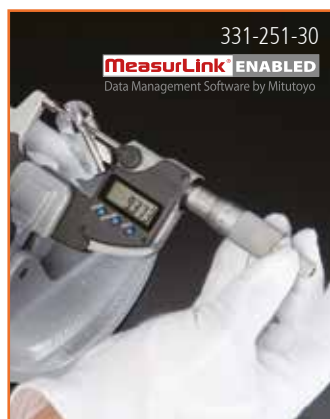

## U-WAVE WIRELESS TRANSMITTER ON THE BACK SIDE OF MICROMETERS

› The shape and size of the transmitter unit is corresponding to the display unit, hence ergonomic in your hand
› Up to 20 m communication within visible range
› Secure and reliable data transmission
› Easy data export to Microsoft® Excel® or other applications
› Data transfer is confirmed by the transmitter through a buzzer or LED
› Low power consumption (400.000 data transmissions with a single battery)

QuantuMike – FOUR TIMES FASTER THAN STANDARD DEVICES

› Faster measurement by using a coarser thread which feeds the spindle by 2 mm per thimble rotation
› Ratchet thimble mechanism ensures easy single-handed or stand operation
› Excellent resistance against water and dust (IP65 protection level) enables this micrometer to be used in machining situations that include splashing coolant fluid

	Spindel travel
1 rotation Standard	0,5 mm
QuantuMike	2,0 mm

STATISTIC PROCESSING PRINTER DP-1VA DATA PRINTER AND LOGGER

› Used for statistical evaluations and data printout from calipers, micrometers, and other measuring devices equipped with a Digimatic port.

› Quick and quiet, the printer operates with single-button touch operation and at an extremely low noise level. The thermosensitive paper boasts outstanding durability and chemical resistance for long-term storage.

› The printer also provides a timer function used for predetermined measurement data loading.

› Data transfer from the printer to PC couldn't be easier, using USB (VCP/HID) output (USB IT-PAK Vers. 2.1 or later, MeasurLink, Excel, etc.).

› With the Data Logger function, up to 1.000 data records can be saved with time and date. Data can be saved even after the power has been turned off.

FEATURES OF DIAL INDICATORS

Bezel clamp and limit hands come as standard accessories

The crystal is flush with the outer ring for protection against scratches

4- screw mounting for enhanced impact resistance

Tool-less connection of the lifting lever due to dovetail design

Hard coated glass for scratch resistance

Wear-resistant outer ring made from rigid plastic

A stem bush design for trouble-free stem clamping (longer clamping range)

Clamping range

Clearance to avoid direct influence of clamping force

Spindle

FEATURES OF DIAL TEST INDICATOR

∅ 8 mm stem for fitting dovetails is a standard accessory

A ∅ 8 mm plain stem (21CAB104) that attaches to any dovetail on the frame is supplied as a standard accessory.

Stylus length on the dial face

The length of the applied stylus affects the indicator's scale factor. The appropriate length is indicated on the dial face to assist a customer with ordering the correct replacement stylus.

Attachable limit hands

As for dial indicators, Limit hands 21AAB363 (optional) can be attached to the bezel – allowing for easy identification of the upper and lower limits of tolerance.

ACCURACY SPECIFICATION

The accuracy specification is compliant to the new EN ISO 9493 for dial test indicators and EN ISO 463 for dial indicators

EN ISO 9493/EN ISO 463

Calibration using analog-type indicator

Calibration using digital type indicator

Calibration using bore gauge accessory set (type C)

Calibration using dial test indicator accessory set (horizontal type)

Inspection using linear gauge

Inspection using lever probe (inductive probe)

CALIBRATION INSTRUMENT FOR INDICATORS
i-Checker

This instrument achieves the highest accuracy in its class (Mitutoyo survey, February 2016) and, therefore, guarantees ultra-reliable calibration results. Analog type indicators are calibrated in semi-automatic mode with the pointer of the indicator being manually adjusted at each measuring point with automatic transfer of calibration results and movement to the next measuring point.

Supported industrial standards:

› ISO, JIS, JMAS, ANSI/ASME, DIN, VDI/VDE/DGQ, BS
› Calibration standards can be set to customer specifications
› All functions necessary for calibration can be found on the control box, making operation quick and easy

CHARACTERISTICS OF MITUTOYO STEEL GAUGE BLOCKS

> Outstanding dimensional stability: Mitutoyo steel gauge blocks are made exclusively from artificially aged material.

> High gauge reliability: Mitutoyo gauge blocks can be a useful standard for a long time due to their high dimensional stability.

> The maximum permitted length changes to gauge blocks over a year are defined in EN ISO 3650. Mitutoyo high-quality gauge blocks easily meet these and all other requirements.

> Steel gauge blocks are excellent for use as a standard because of the low measurement uncertainty.

> Mitutoyo steel gauge blocks have top-quality surfaces, guaranteeing high wringing force.

Accuracy check of a caliper

Block allocation 47		
Size	Step	Quantity
1,005	–	1
1,01–1,19	0,01	19
1,2–1,9	0,1	8
1–9	1	9
10–100	10	10

Block allocation 87		
Size	Step	Quantity
1,001–1,009	0,001	9
1,01–1,49	0,01	49
0,5–9,5	0,5	19
10–100	10	10

CHARACTERISTICS OF MITUTOYO CERAMIC GAUGE BLOCKS (CERA-BLOCKS)

> Wear resistant: CERA blocks feature ten times the abrasion resistance of steel gauge blocks and three times that of hard metal blocks.

> Due to the ceramic material, these gauge blocks are resistant to corrosion.

> These gauge blocks are more or less free from dimensional change over time.

> Steel and ceramic have similar expansion coefficients which reduce measurement errors due to temperature change.

> All Mitutoyo gauge blocks have top quality surfaces, making it possible to adhere ceramic blocks to steel ones.

> Free from burrs caused by scratches, CERA blocks are very dependable.

> Non-magnetic: powder (iron grit, etc) will not adhere.

> Easily legible markings, the dark characters stand out on the white ceramic surface.

Above-mentioned prices are Mitutoyo's suggested non-binding retail prices without VAT.

LITEMATIC VL-50S-B

This is a high-accuracy gauge head with a separate controller.

The LITEMATIC VL-50 offers you the following benefits:
> It has a measuring force of 0,01 N (1 gf) and a resolution of 0,01 μm.
> Its constant and low measuring force makes it especially suitable for measuring soft materials such as rubber, plastic, film thicknesses, or sensitive form parts.
> The motor-driven plunger gives you a range of approach and retraction speeds for safe and easy operation.
> The head is supplied with a separate controller so you can mount it in a measurement fixture, or on the optional comparator stand.

ROCKWELL HR-530

> New and intuitive user interface

> Multiple test force generation possibilities for Rockwell, Rockwell Superficial, and Brinell hardness up to 187,5 kgf

> Supports Brinell depth measurement, ISO2039-2 Plastic test, and Rockwell Alpha test

> HR-530 can perform 47 different hardness testing scales

> Workroom height 250 mm or 395 mm

> A lever indenter arm makes for easy reach of interior surfaces (min. ⌀ 40 mm / ⌀ 22 mm, when using an optional diamond indenter) and exterior surfaces, providing the overall best overview of the specimen.

> Real-time electronic test force control provides accurate loading and perfectly eliminates the overshooting of test force. It also enables a precisely executed test time cycle, achieving excellent repeatability.

> Time-saving serial test mode, which allows serial testing without changing spindle position. The serial test can also be operated via footswitch.

> Auto-stop table elevation and automatic preloading provide stable test force generation.

ECONOMIC ROCKWELL HARDNESS TESTING MACHINE
ROCKWELL HR-110MR / HR-210MR / HR-430MR

> The frame design provides maximum clearance for positioning the workpiece. (flat table for tester mounting required)

> Supports Brinell up to 187,5 kgf with an optional test force weight

Three different models manual/semi-automatic analog and automatic digital type:

> Manual weight change for HR-100 and HR-200

> Weight change by rotary knob for HR-400

> Manual test force application for HR-100

> Semi-automatic operation for HR-200

> Automatic operation for HR-400

> Increased process safety by adding K543817 clamping device

FORM MEASURING INSTRUMENTS

MOBILE ROUGHNESS MEASUREMENT – SURFTEST SJ-210 / SURFTEST SJ-310

> The portable instruments allow for easy and accurate surface roughness measurement.

> Made for on-site use, the SJ-210 has a sturdy design perfect for industrial environments.

> EN ISO conform stylus radius of 2 µm, with a measuring force of 0,75 mN.

> EN ISO conform skid radius of 40 mm – convenient for surface roughness $\lambda c = 0,8$ mm.

> Support of VDA standard and special parameters like Rz1max.

> The color LCD provides excellent readability and includes a backlight for improved visibility.

> Easy and intuitive menu navigation.

> The SJ-310 drastically improves operation time thanks to its touchscreen and built-in printer. With the choice to print results, profiles, conditions, and more automatically or on demand, you are provided with a physical copy of the information right away.

> The SJ series performs roughness analyzes according to various international standards (EN ISO, VDA, ANSI, JIS) and customized settings.

> Using colored tolerance judgment, both instruments can provide users with a quick but accurate analysis.

> Both the SJ-210 and SJ-310 are available with a standard detector as well as two others with retracting (R-type) or traversing (S-type) functionality.

> The SJ-210 is available in two different language sets with a total support of 21 languages.

M2 DATA PROCESSING SYSTEM FOR PROFILE PROJECTORS INCL. TABLET PC

Intuitive and easy to operate 2D data processing system with touch screen operation

Mean features:
- › Measuring point acquisition by crosshair (63AAA406) or optional optical edge detector (63AAA407)
- › Measure, construct and define 2D features
- › Part program teach-in
- › Comprehensive measurement reports
- › Tolerance check according to DIN/ISO

The system consists of:
- › M2 Metrology software
- › 2 axis interface box and 15 pin connecting cables
- › Power supply and USB cable
- › Machine bracket, RAM Ball, RAM arm, VESA mount for mounting the optional tablet PC to the projector body

Optional but necessary accessory included in the price
- › Tablet PC with touch screen operation and Microsoft® Win10, 64 Bit operating system (Please consult your local Mitutoyo supplier for more details.)

FIXTURES

CMM FIXTURE KIT SERIES eco-fix

The Mitutoyo "eco-fix" fixture kit series is a very fast and affordable solution for clamping workpieces on the CMM. In just a few minutes your fixture is ready for measurement. Therefore, eco-fix is a very attractive alternative to customized jigs.

> Fits all CMM brands
> Build your individual fixture in only 20 minutes!
> Flexible modular systems
> Fast & affordable
> Suitable for various different workpieces or other measuring equipment
> Easy adaption to product changes
> M6 thread pattern
> Purchase one kit for each workpiece
> Also ask for eco-fix extension kits!

K551549	eco-fix L Fixture kit for mid and large-sized workpieces. Including: **Base plate 500 mm x 400 mm** 97 eco-fix clamping parts, e.g. brackets, location pins, spring clips	1.752,00	**1.499,00**

CMM PALLET RECEIVER eco-fix KIT SERIES

The manual pallet receiver system for CMM enables the user to speed up and master repetitive measurements with ease. The base plate, equipped with handles and spheres on the bottom surface can be repositioned quickly and precisely on the receiver pallet.

The use of a second base plate with the same fixture, can speed up serial measurements significantly. While the measurement program is running, an identical follow up workpiece can be mounted on the fixture so the workpiece change over time can be reduced accordingly.

Whatever your challenges are, Mitutoyo supports you from start to finish.

Mitutoyo is not only a manufacturer of top quality measuring products but one that also offers qualified support for the lifetime of the equipment, backed up by comprehensive services that ensure your staff can make the very best use of the investment.

Apart from the basics of calibration and repair, Mitutoyo offers product and metrology training, as well as IT support for the sophisticated software used in modern measuring technology. We can also design, build, test and deliver bespoke measuring solutions and even, if deemed cost-effective, take your critical measurement challenges in-house on a sub-contract basis.
